Ceramic Dies

Manufactured to fit any die / pressure head combination. These dies give excellent finish to the product, especially when a smooth surface is required. They are equally suited to a textured or rusticated finish, bricks or tiles.

The dies are formed to your requirements, with or without bottom ribbing, corners with radius, concave or convex headers and stretchers.

Wear life / cost is excellent, we have dies running in excess of 12 months without any visible signs of wear.
